Education

Malaviya National Institute of Technology, Jaipur

CGPA: 7.21

B.Tech in Electronics and Communication Engineering

2022 – 2026

Prince Uch Madhyamik Vidyalaya, Rajasthan

Percentage: 95.33

+2 Intermediate

2021

Tagore International School, Bhardra

Percentage: 93.8

Matriculation

2019

Work Experience

Bharti Airtel Limited

May 2025 – July 2025

Software Development Intern

- Developed an internal network monitoring dashboard using **Python**, **Flask**, and **MySQL** to track real-time network performance metrics across multiple towers.
- Built REST APIs for data aggregation from network devices and integrated **SMS alert system** using **Twilio API** for critical failures.
- Designed the frontend using **React.js** with interactive charts to visualize tower uptime, signal strength, and customer complaints.
- Implemented user authentication and role-based access control for network engineers and managers.
- Deployed the application on **AWS EC2** and documented the entire system architecture and API endpoints.

Projects

Wanderly – AI Trip Planner | *React, Google Gemini, Firebase, Leaflet, OpenStreetMap, Tailwind CSS* **GitHub** | **Live**

- Built a full-stack AI travel planner where **Google Gemini** generates day-wise itineraries with ordered nearby stops, travel legs, timings, and budget notes based on user-specified destination and trip duration.
- Integrated **Nominatim** for city/place autocomplete and rendered interactive route maps using **OpenStreetMap** + **Leaflet**; enriched itineraries with nearby hotels, restaurants, and attractions via **Overpass API**.
- Implemented **Google OAuth** via Firebase Authentication and used **Firestore** to persist each user's saved trips across sessions; added demo mode for offline UI preview without Firebase credentials.
- Built a responsive dashboard with **Tailwind CSS** and **ShadCN** components and deployed the app on **Render**.

MDPS – Multiple Disease Prediction System | *Python, Streamlit, scikit-learn, pandas*

GitHub | **Live**

- Built a **Streamlit** web app that predicts the likelihood of **Diabetes, Heart Disease, and Parkinson's** from user-supplied clinical parameters using trained ML classification models.
- Trained and evaluated multiple **scikit-learn** classifiers (SVM, Logistic Regression, Random Forest) on disease-specific medical datasets; selected and serialized the best-performing model per disease via **pickle**.
- Implemented a **pandas** preprocessing pipeline covering feature scaling, missing-value imputation, and label encoding to ensure clean, model-ready input data.
- Deployed as a multi-module app on **Streamlit Cloud** with a sidebar navigation panel to seamlessly switch between disease prediction modules.

Technical Skills

Languages: C++, Python, JavaScript, SQL, HTML, CSS.

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Socket.io, TailwindCSS, scikit-learn, pandas.

Databases: MongoDB, MySQL, Firebase Firestore.

Tools & Platforms: Git, GitHub, Vercel, AWS (EC2), Postman, Streamlit, VS Code.

APIs & Services: Twilio API, Google Gemini AI, Overpass API, RESTful APIs, NSE REST APIs.

Concepts: Data Structures & Algorithms, Operating Systems, OOPs, DBMS, Machine Learning, Linux.

Certifications

Full-Stack AI Engineer 2026: ML, Generative AI — Udemy

2026 – Present

Master Python, Machine Learning, DL, MLOps, and Gen AI through hands-on projects to become a Full-Stack AI Engineer.

Achievements

Secured **top 1%** rank in JEE Mains out of over 1 million candidates.

Competitive Programming: Codeforces **Specialist** (Rating: 1540).

Positions of Responsibility

General Secretary: Film Making Club, Cultural Society, MNIT Jaipur — Managed club operations, coordinated events, and handled team communication and scheduling.

Core Member: Marketing Team, *Blitzschlag* (Largest College Cultural Fest of Rajasthan), MNIT Jaipur — Assisted in sponsorship outreach and promotional activities for the annual cultural festival.
